BEUER AUTOMATE Company  
Address: 17th ave downtown

Dear Hiring Manager:

Please accept my resume in consideration for the part-time Junior Low-Code Developer position with BEUER AUTOMATE. I have graduated from the Bow Valley College [Relevant Program, e.g., Software Development or UX/UI Design] program. I am a dedicated, detail-oriented, and innovative candidate and am looking forward to the opportunity to contribute to your organization by leveraging my UX/UI and front-end expertise to enhance low-code development efficiency and improve user experience

Some of the reasons why I believe that I would be a strong candidate for your organization include:

- Field Experience: UX/UI Designer at Silkroad Visual Technology and Wicresoft (outsourcing to Microsoft), specializing in bridging design and development.
- Project Experience: Built interactive dashboards, data visualization platforms, and enterprise applications with low-code adaptability.
- Technical Skills: Proficient in front-end technologies (React, Vite, Recharts.js, PDF.js) and UX/UI design tools (Figma, Office 365).
- User-Centered Approach: Experience in optimizing workflows, enhancing usability, and improving system efficiency.

I look forward to meeting with you to discuss how I would be able to make a contribution as a member of BEUER AUTOMATE's team. Thank you in advance for your time and consideration.

Sincerely,

Yizhuo Hu
